Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Beer et al. (U.S. Patent Number 5,458,642).

Beer et al. disclose a multiaxial artificial disc replacement comprising a lower component adapted for fixation to an inferior vertebral body, 11b, an upper component, 11a, adapted for fixation to a superior vertebral body (see figure 1), and an element, 13a-13e, that allows movement between the lower and upper components along two separate, independent orthogonal axes, wherein one of the axes is generally medial-lateral and the other axis is generally anterior-posterior (see figure 1 and column 2, lines 49-58).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3732

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Grooms et al. (WO 99/21515).

Beer et al. disclose the claimed invention except for the element being a cruciate-shaped axle. Mehdizadeh discloses a multiaxial artificial disc replacement comprising a lower component, 12, an upper component, 11, and an element, 19, between the components (see figure 2). Mehdizadeh further shows that the element can be a coil spring or a cruciate-shaped spring (see figures 2 and 9, respectively), and he teaches that these are functionally equivalent structures. It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the device of Beer et al. with the element being a cruciate-shaped spring instead of a coil spring, in view of Mehdizadeh, as such would merely constitute a substitution of functionally equivalent structures.

Response to Arguments

Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 for art cited of interest.
